Summary

I have about two years of experience in software engineering. I am proficient in Python and Node, focusing on backend development. I also have some experience with C, bash, and DevOps. I have led and collaborated with teams while working on personal projects and businesses.

Skills

Node.js · Express (express.js) · PostgreSQL · Python · Flask · C Programming · DevOps · HTML · CSS · Javascript · React.js · Git · Bash · Docker · MongoDB · REST APIs · SQL · Nginx · Algorithms and Data Structures

Projects

[WhatsGPT](#)

Jan 2024 – Jan 2024

Technologies: Node.js • Express (express.js) • PostgreSQL • Openai API • Twilio API

This is an AI Chatbot I created using OpenAI and Twilio API. I made the chatbot as a way for me to access ChatGPT from the comfort of WhatsApp.

[PodSnips API](#)

Oct 2023 – Oct 2023

Technologies: Python • Flask • Podcast Index API

This Flask-based web API allows users to create short clips from podcast episodes. Users can quickly generate a clip of their desired segment by providing the name of a podcast, an episode number, and start/end timestamps.

[AfroBeatStats](#)

June 2023 – July 2023

Technologies: Python • Flask • Spotify API

This simple webpage tracks the top Nigerian artists based on the Spotify API.

[dJetLawyer AI](#)

Technologies: Python, React, FastAPI, OpenAI API, Langchain, PostgreSQL, SQLAlchemy, Google Sign in April 2024 - Present

This is a legal AI chatbot. Users can ask any question on Nigerian law, and the AI would respond. The AI is able to do this by using information from <https://www.djetlawyer.com> to power its RAG architecture.

Education

ALX Backend Certification

Sep 2013 – Sep 2018 · 1 yr

ALX/Holberton School

- At ALX, I learned the fundamentals of algorithms and data structures. This involved me learning C, Git, and the Command Line.
- I worked with HTML, CSS, and Javascript to gain some knowledge of front-end development.
- I worked with Python, Node, React and Express and was able to use it to build the personal projects I mentioned above.
- To round it all up, the program included learning about DevOps. This included things like nginx, SSH, Docker, and a host of other things.

LL.B: Law

Sep 2013 – Sep 2018 · 5 yrs

University Of Ilorin

While pursuing my degree, I also engaged in extracurricular activities. Here are some of my achievements:

- I was the Financial Secretary of Equity Chambers, where I oversaw the digitisation of the association's financial records.
- I was a University Debate Team member and finalist at the All Nigeria Debating Championship in 2018.
- I was a member of the Legal Aid Clinic and participated in prison decongestion initiatives.

Work Experience

Founder/CTO - dJetLawyer

June 2015 -

Present

- I created a website that serves as a repository of materials for Nigerian law.
- Created content dominates Google Search result pages.
- I grew the audience to 20,000 users per month.
- My content was cited by the Nigerian Supreme Court while delivering a judgement.
- Created a legal AI chatbot.

Content Writer - Alibaba.com

Mar 2021 - 2022

- Created content for the Alibaba blog
- Multiple created content landed on the top position of Google results.
- Collaborated with the client to ensure I understood the content requirement and worked on creating content to achieve their business goals.

Certifications & Awards

ALX Backend Certification - African Leadership Institute (ALX)

Nov 2023
